Captain Gary's Marine Care Products

Elite products for the most demanding boat owners!

Captain Gary's *Marine Care Products*

Captain Gary's Marine Care Products was started by a Head Boat and Sport Fishing Boat owner and USCG licensed Captain. Captain Gary operated and ran out of Swan Point Marina in Sneads Ferry, North Carolina for over 20 years. In fact Captain Gary's reputation for catching fish was such, that there is a well known fishing area in the ocean named after him. This area was named after him by his customers, peers and other boat captains that operated out of New River Inlet. "Gary Ballard's Place" can still easily be found on most nautical fishing charts of that area! During the winter and off seasons, Captain Gary operated Commercial Fishing Boats such as trap fishing, long lining and shrimping throughout the southeast. Captain Gary has also operated Tour Boats and Crew Transport Vessels.

In 1996, Captain Gary began a new career in the industrial chemical business, and soon started his own company, EnviroServe Chemicals, Inc.

Captain Gary continues to be an avid fisherman and boat owner today. He passionately fishes in fresh, brackish and salt water settings. He has come to realize that most devoted fisherman and boat owners like himself, wanted a full line of marine care products that would thoroughly clean, enhance and protect their boats and all boat components. Captain Gary developed a full line of these products. We have products that will enhance both older and newer boats, products that work from bow to stern from keel to bridge and inside the bilges to the outside hull. We have products for wooden, fiberglass and aluminum boats as well.

The main manufacturing facility for EnviroServe Chemicals is located in Dunn, North Carolina. In addition to fulfilling production needs for EnviroServe Chemical's Industrial product lines; ESC-FoodDiv products, Kleaner Solutions products, and Captain Gary's Marine Care Products, we also make numerous items under private label programs for major industrial chemical companies and consumer goods marketers.

Captain Gary's Marine Care Products are available at fine marine supply stores, marinas, sporting goods locations and on-line. If you need assistance, do not hesitate to call our number (910) 892-1791 and we will be glad to help you.

The *Captain Gary's* marine care product line is complete and extensive. Our full line of products have been thoroughly researched and tested on various Head Boats, Sportfishing Boats, Commercial Fishing Vessels, Crew Boats, Tour Boats, Tug Boats, Ferry Boats, Pleasure Boats, Yachts, Bass Boats and many more. Our products are frequently used by many marinas and boat mechanics on their own personal boats as well as for repairs, additions and work being done on their customers' boats.

Captain Gary's full line of marine care products includes all of the products needed to maintain any boat in top notch condition, regardless of size or type. We have several products that are designed to restore the original luster and appearance of new fiberglass, or aluminum. In many cases, our products will bring damaged and worn looking finishes back to an almost new appearance. We have many products that are purposely made to accomplish specific tasks. Our complete line of products will surely make your boating experience more enjoyable by taking out many of the burdens associated with cleaning, polishing, protecting and maintaining your boat.

"Environmentally Friendly" Products

Captain Gary's "safe at sea" marine care products have been developed for use while at sea. Unlike many products which contain phosphates and other harsh chemicals, our "safe at sea" product line does not. Regardless if you are a recreational or commercial boater, all of us enjoy watching nature take place around us, whether we're simply sitting on our boat in its slip at the marina or cruising on the lake, river, ocean or sound. We always enjoy watching the blue herons stealthily hunt for fish or the seals and otters stick their heads out of the water to see what's going on in our world. We often wonder just how clean our waterways are for these creatures, the water fowl, the plants and the fish, and what we can do to prevent adding more pollution to their environment. With that in mind, we have built as many "safe at sea" cleaning products as possible. You can use these products for cleaning your boat with the very least amount of negative impact on our environment. We have formulated our "safe at sea" cleaning products to have a minimum effect on the plants, fish and animals in our precious world. Our "safe at sea" products do not contain unnecessary fragrances, dyes, additives or fillers. They are concentrated, are high quality and are 100% guaranteed.
